JOSEPH'S PLACE IN GOD'S PLAN 14-16, 25, 41-43,
GOLDEN TEXT—Seest thou a man dillgent in his business? he shall stand before kings.—Proverbs 22:29.

Does it pay to trust God? Does roubles of His people? Does He have anything to do with the affairs of the world? Men are asking such questions in our day, and we have the answer in God's dealings with men in the past.

The story of Joseph is fascinating from almost any angle, but it holds no more important truth than that the man who honors God in his life will be honored by God (I Sam. Della Viola Felton, wife 2:30), even in the hardest place, yes, vell known Elba colored Joseph appears before us in our

AMERICA'S NEW

INDUSTRIAL FRONTIER

A BANKER appraises the South

THESE FACTS about the South are from a speech made recently in New York by ROBERT M. HANES, Presi-Association of Reserve City Bankers, and past President, American Bankers Association and North Carolina Bankers Association.

Resources: The South produces 95% of the nation's cotton ... 90% of the tobacco ... 75% of the natural gas ... 60% of the crude petroleum ... 50% of the bituminous coal ... 40% of the lumber ... 47% of the wood pulp ... 12% of the iron ore, and 26% of the electric power output. The South has 80% of the active cotton spindles and manufactures 90% of the nation's tobacco products and 26% of its paper and paperboard.

Industry: From 1900 to 1939, the value of the South's industrial production increased 700% as compared to a 366% increase for the states outside

Agriculture: The intensified need for foods and raw materials has forced improved methods, diversification and intensive cultivation in agriculture. Farm mortgage debt has been greatly reduced and the farmer has learned new techniques and better farm management. In 1943, the South accounted for 40% of the national farm crop income.

Transportation: The South has 81,473 miles of railroads, 350,000 miles of modern highways, 21 airlines, and excellent ports, harbors and inland

Banking: In 1910, the South's banking resources were \$3,275 million; today they are \$23 billion. Savings deposits have increased from \$575 million to \$31/2 billion, and life insurance in force from \$31/2 billion to more than \$30 billion.

Pattern for Progress: The war production program has brought new and diversified industry to the South, developing a large supply of skilled labor. The South is a land of mild temperatures, ample rainfall, abundant sunshine and long growing seasons. Its people are not crowded together in large cities, but scattered in smaller cities and towns, where living and working conditions are more attractive. They are supported partly by industry and trade and partly by agriculture. This pattern fits perfectly into the current trend of dispersal of large
